DATA SUMMARIES

(S/NF/SG/LIMDIS) Following are the perceived highlights from each source.

- (S/NF/SG/LIMDIS) Source A: SG1B

-- The target, [REDACTED] is associated with the letter "S" in terms of the name of the location. The activity includes a large ship in the area which off-loads contraband into smaller boats, which are related to the main vessels, and delivers the drugs to the shore or an island. The drugs are in square packages wrapped in plastic and will then be transported alternatively from the target location in a north western direction. A helicopter will be involved in this scenario which monitors the transaction from above. Communications, including radio communications are at the site. Although something may occur within the next three days, April 11th is an important date to the activity.

- (S/NF/SG/LIMDIS) Source B:

-- Information pertinent to target:

--- an old and abandoned structure or wreck solidly embedded in land; only a portion of which is present or visible. This object has the appearance of being composed metal reminiscent of quonset hut material. A curved surface; an old chair or bench nearby.

--- there are currently five boats present; one large and four smaller. The former dwarfs the latter.

--- the concept of a rendezvous in very shallow water; the concept of a transfer.

--- green leafy clusters which are long and lumpy.

--- large, slender fish (maybe dolphins) being moved between two of the boats; gray-blue and stream lined.

- (S/NF/SG/LIMDIS) Source C:

-- The activity consists of a very large vessel that can be considered a freighter. This freighter is dark in color. This vessel is carrying a very large amount of contraband in the form of illegal drugs which it has received from the Far East. This vessel is currently sailing north. (See attachment A).

-- This vessel will soon off-load the contraband into a smaller vessel or smaller vessels that are a little bit bigger than canoes but smaller than a speed boat. The smaller vessel or vessels are white and blue in color. The smaller vessel or vessels will bring the contraband to shore. This off-loading activity will occur at night around midnight. The man driving the smaller boat is small and dark in color.

-- The contraband is wrapped in plastic bundles. The contraband will then be put into a very large convoy or truck that will drive south down a highway. The convoy has big white doors in back. There will be a helicopter that is part of the scenario. a helicopter will be flying to the left of the convoy monitoring it. (It is possible that the helicopter could be carrying law enforcement agents who are monitoring the situation).

-- The area where this activity is taking place is very warm and could be a resort area. It is very pretty. The area could be an island.

-- Also, the number "069" was seen on a side of a light tan wall structure.

-- Geographical coordinates associated with the overall activity or off-loading activity are 12 degrees and 72 to 82 degrees. However, it could not be determined if 12 degrees meant north or south and if 72 to 82 degrees meant east or west. If customer knows approximately where activity is occurring, these coordinates may be of help.
